

Just a little political analyse of Hungary (and a little more...)

We have two dominant political groups. One is around Orban at this time, and the other side an "unorganised, impotent" Opposition, but this Opposition only in a very small percentage real political Opposition, and in a very small percentage acting against the politics of Orban (and the old regime – before 1989.....). Maybe this small political groups has also members already, they are not truth opposition, they are only informers i.e.

Many bigger "opposite" political groups aren't real impotent and opponent, as they shows at this time. The system of Orban (the laws, i.e. about the voting rights, ...) will be a very good usable tool later for this groups also. They will enjoy it, if it will be enough i.e. to get 25% of votes and act as the >67% of "hungarian" parliament. And with very good tool set to detect, neutralise and destroy the actual true opposition (!!!!): The truth democrats, the truth christians, the truth nationalists, the truth liberals, ...

Much more people in the FIDESZ-KDNP union could be a real political opposition of the politics of Orban and a real political opposition of the old regime (before 1989), I think. They are at this time only puppets in the tool-set of Orban. They hope only, that they aren't puppets. They hope they acting as good as they can act at this time. Terrible to see / understand this situation. Later they will be destroyed, integrated or planned to be destroyed, as the centralised politics need it. The process is running, I see, and I feel on my story, on my environment also, since I come back with my family to Hungary in late 2016.

Before 1989 we had two Parties in Hungary. MSZMP and KISZ. Both said, they are left-radical political groups, but this wasn't a true statement. They were only two groups of selected puppets for a russian colony (a real governmental leaders (MSZMP), and an organisation from some young people (KISZ: Communist Youth Union v.s. FIDESZ: Democratic Youth Union) - to be selected later to be the leaders for the government...). Orban, Deutsch and many young people was i.e. in KISZ a member. Nobody was able to learn in an university up to ~1984 without to be selected as a member for KISZ..... It was a must for a study. As I visited my high school, the leader of KISZ in the same high school was Tamás Deutsch. I don't joined to KISZ.

As I started to learn in an University (BME) in 1984 I was asked also to be a member for KISZ, but I said NO - and they wasn't enough strong more to say no for my study. I know, I risked at that time, to be deselected politically for the study. They tried to organise me in KISZ often then, we talked oft about it, but I wasn't disturbed politically harder at that time. I planned to be an engineer, and I thought I don't need to do politics in my life. Then it happens the „changes”, or better a try to do „changes” after 1989. I broke my study for some years. I was happy – it happens a change. Not I was happy – I know. The whole Europe got a hope, I think.

I see, **after the decision of EPP and Manfred Weber in in this year**, it is possible to loose the "majority" of the FIDESZ-KDNP union in Hungary. **It is a good and needed change, I think.** This "majority" is 15% What should I say???? It will be break to mindest 3 parties. Maybe 5% (true opposite of Orban in FIDESZ) – 5% (KDNP) – 5% (remains for Orban)? Not. The percentage and the count of parties will vary, and many opportunists will work / act later otherwise as before. The truth democrats in FIDESZ-KDNP will break up more, sure!!! The target reached? Democrats lost positions in Hungary? Seemly yes, I think. But it is a needed step to get the government away from Orban. It would be a wonder, if it don't happens. All remained parties of FIDESZ-KDNP union will get a such influence in hungarian political life, as Momentum, LMP, Jobbik, ... has today... 2-3%. This parties will feel self luckily, if they got position in a next „hungarian” parliament. This was the true glue - up to this time in this political system.

The not any more "unorganised, impotent" Opposition after a such political change - the political followers of the already changed old MSZmP – DK, MSZP, ... with many opportunists - will build up an organised dictatorship with (of course reformed.....) tools of Orban. Again MSZP and Gyurcsány. We will get later some true words about it in Öszöd :D Yes. The whole will get a support of many people at the start, they hoping a good future, hoping "Kádár" to be back, but he is only a past already, and it wasn't such a good thing. The politics of Orban based to show the negative sides of capitalism, nazism for the people, but payed a little debt back to the banks - with "natural" pressure on the standard people, because the debt. The people should then hope a "good social regime as Kádár's regime was before 1989...", through many many debt. RETRO feeling. Other target reached?

The politics of MSZmP based allways to make a big debt for the whole Hungary and give it to the politically selected people to act as "social", and do agains the "dangerous nazism". To present the „wrong” kapitalizm and the „wrong nazis” are the truth target of "the light dictatorship of Orban" - with many provocation, with a little nazism behind - I think – to push people to right or to left (to religions as Christs or truth „scientists” of the psychiatrie – a religion for materialists - with some violence as a motivation. I dont find this violance a good political or „medical” solution to select for somebody a religion, I should say. I selected i. e. 'No' Religion as a religion for me.). This politics was exported to the west well. It supported with lists, IT and Apps, I think. BREXIT, GREXIT, ... i. e. is some movements because this extremists. We shouldn't laugh on Englanders, Greeks, Catalans and It has a reason, I think, if an old europeer nation, culture says 'No' agains movements in the EU. We should detect the reality behind a 'No', and we should act as a truth europeer.

And the whole system (Orban AND MSZmP as „opposition”) is to show for the standard (hungarian) people, they are vulnerable, they can't do anything. This is a provocation with many vindictiveness because of the past. 1989? or earlier? The vindictiveness has many different motive in Hungary and around, because of many different events between religion groups or nations in the past.

I think, not only Hungary is the only target for such movements. The EU would be also a good, big and fat target for a dictatorship. The USA also. With well tested tools. In Hungary I found MANY BUGs in tools of this dictatorship-try. Luckily.

The truth democrats, truth Europeans should save our Europe agains any exaggerated vindictiveness. We should act agains vindictiveness with steps. We should understand, what is behind they, and we should pay attention for the motivations, and we should give compensation well and rich - more as enough. Vindictiveness is a very dangerous thing. We should it close well, and don't left it to act periodically again, as a periodically threatening extortion of „compensations”. I think, it isn't a simple act.

What are the tools of a such extremist political movements? It exists not only one such movement, I think!!! The groving violence and the groving tension between political groups in the EU speaking about, it exists many such movements. It is a good thing, that the biggest masse of people in the (west) EU remains cool, remains peaceful and not voted on big amounts on extremists. Here are a list about the tools agains the freedom and democracy in the near future of our chlidren. They are well distributed around our whole globe...:

- **Papermoney.** i.e. HUF (, USD, EUR, Bitcoin, Tether USD, ...)
- **A new religion, integrated well in the laws of the states of the world, accepted from "everybody", it based on the surface of our science, but it can use ambiguous or obscure oracles...** It should be enough materialist for our slowly godless world. To forget our true creator,

our natural living environment, our (living) REALITY, and to forget what we did / do against it. Yes. My "delusion". :D **The Psychiatry. But the light usable and well misused form.** This form doesn't need a true knowledge more, only i.e. vindictiveness or simply greediness... and a target person. With cookbook, provocations, mobbing, flooding - and producing a true mental illness at the end. Or? As in the Middle Ages the Inquisition acted, acting this tool similar nowadays... But for every purpose and for everyday use. Or?

- **A truth. It is (of course) the only one true truth.** Our law needs it. Our laws speaking about an absolute truth. But I think, every truth are subjective. Just think of a fox and a rabbit. We should use the truth of our natural living environment, not forget it, that it exists natural living environment without humans, but humans can't exist without our natural living environment, without our living Gaia. Mindest we have some germ in our bowel in a desert of the Mars or of the Moon...

- vindictivenesses (as detailed before) in many groups of people

...

What can we do?

- I think, we should use **money, but well backed with existing valuables.** It blocks movements, they don't have enough resources to act well on our globe. Nobody can sell then the future of our children - if somebody sells, offers something, it exists already. Later we can use clear barter. We have a well IT environment to implement a such system already. I do experiments with such systems at this time as full time job, as a PM in the projekt Vortexledger as „No Business” of course.

- **We shouldn't trust a dominant religion in a government.** It is only a tool against freedom in the religion, but the **freedom in the religion** should be given as a base human rights for everybody. The **freedom for thinking, speaking** should be given also. Such religion can save criminals and discredit people with differences (and maybe valuable differences – and if only a difference, but don't harm really, why should we discredit it?).

- We should change our laws. **Our laws should use the truth of our natural living environment.** We, humans, are also in it! It is our whole living **REALITY - our truth GOD** - I think. We should leave local the freedom to be conservative, to be liberal or to be social, ... in small local communities, and we should have organisations above in the bigger governments, which organisations contains truth and removable democrats from different nations, from different religions with different values and issues. The local communities should be more smaller as a state at this time in the EU.

- to solve vindictivenesses (as detailed before) well

...
