

## **Just a little political analyse of Hungary (and a little more...)**

We have two dominant political groups. One is around Orban at this time, and the other side an "unorganised, impotent" Opposition, but this Opposition only in a very small percentage real political Opposition, and in a very small percentage acting against the politics of Orban. Maybe this small political groups has also members already, they are not truth opposition, they are only informers i.e.

Many bigger "opposite" political groups aren't real impotent, as they shows at this time. The system of Orban (the laws, i.e. about the voting rights, ...) will be a very good usable tool later for this groups also. They will enjoy it, if it will be enough i.e. to get 25% of votes and act as the >67% of "hungarian" parliament. And with very good tool set to detect, neutralise and destroy the actual true opposition (!!!!). The truth democrats, the truth christians, the truth nationalists, the truth liberals, ...

**Much more people in the FIDESZ-KDNP union could be a real political opposition of the politics of Orban and a real political opposition of the old regime (before 1989), I think.** They are at this time only puppets in the tool-set of Orban. They hope only, that they aren't puppets. They hope they acting as good as they can act at this time. Terrible to see / understand this situation. Later they will be destroyed or planned to be destroyed, as the politics need it. The process is running, I see, and I feel on my story, on my environment also, since I come back with my family to Hungary in late 2016.

Before 1989 we had two Parties in Hungary. MSZMP and KISZ. Both said, they are left-radical political groups, but this wasn't a true statement. They were only two groups of selected puppets for a russian colony (a real governmental leaders (MSZMP), and an organisation from some young people (KISZ: Communist Youth Union v.s. FIDESZ: Democratic Youth Union) - to be selected later to be the leaders for the government...). Orban, Deutsch and many people was i.e. in KISZ a member. Nobody was able to learn in an university up to ~1984 without to be selected as a member for KISZ..... It was a must for a study. As I visited my high school, the leader of KISZ in the high school was Tamás Deutsch. I don't joined to KISZ.

As I started to learn in an University (BME) in 1984 I was asked also to be a member for KISZ, but I said NO - and they weren't enough strong more to say no for my study. I know, I risked at that time, to be deselected politically for the study. They tried to organise me in KISZ often, we talked oft about it, but I wasn't disturbed politically harder at that time. I planned to be an engineer, and I thought I don't need to do politics in my life.

I see, **after the decision of EPP, Manfred Weber**, it is possible to loose the "majority" of the FIDESZ-KDNP union in Hungary. **It is good, I think.** This "majority" is 15% ..... What should I say????

It will be break to mindest 3 parties. Maybe 5% (true opposite of Orban in FIDESZ) – 5% (KDNP) – 5% (remains for Orban)? Not. The percentage will vary, and many opportunists will work / act later otherwise as before. The truth democrats in FIDESZ-KDNP will break up more, sure!!! The target reached? Democrats lost positions? Yes, I think. But it is a needed step. All remained parties of FIDESZ-KDNP union will get such influence in hungarian political life, as Momentum, LMP, Jobbik had before... 2-3%. They will feel self luckily, if they got position in a next „hungarian” parliament.

The not any more "unorganised and impotent" Opposition - the political followers of the already changed old MSZMP – DK, MSZP, ...- will build up an organised dictatorship with tools of Orban. Again. Yes. The whole will get a support of many people, they hoping a good future, hoping

"Kádár" to be back, but he is only a past already. The politics of Orban based to show the negative sides of kapitalism, nacizm for the people, but payed a little debt back to the banks - with "natural" pressure on the standard people, because the debt. The people should then hope a "good social regime as Kádár's regime was before 1989...". RETRO feeling. Other target reached?

The politics of MSZmP based allways to make a big debt for the whole Hungary and give it to the politically selected people to act as "social", and do agains the "dangerous nacizm". This is the truth target of "the light dictatorship of Orban" - with many provocation, with a little nacizm behind - I think. To show for the standard hungarian people, they are vulnerable, they can't do anthing. This is a provocation with many vindictiveness because of the past. 1989? or earlier? The vindictiveness has many different motive in Hungary, and around because of many different events in the past.

**I think, not only Hungary is the only target for this movements. The EU would be also a good, big and fat target for a dictatorship.** With well tested tools. In hungary I found MANY BUGs in tools of this dictatorship-try. Luckily.

**The truth democrats, truth Europeans should save our Europe agains any exaggerated vindictiveness.** We should act agains vindictiveness with steps. We should understand, what is behind they, and we should pay attention for the motivs, and we should give compensation well and rich - more as enough. Vindictiveness is a very dangerous thing.

**What are the tools of a such movements?** It exists not only one, I think!!!

- **Papermoney.** i.e. HUF (, USD, EUR, Bitcoin, Tether USD, ...)

- **A new religion, integrated well in the laws of the states of the world, accepted from "everybody", it based on the surface of our science, but it can use ambiguous or obscure oracles...** It should be enough materialist for our slowly godless world. To forget our true creator, our natural living environment, our (living) REALITY, and to forget what we did / do agains it. Yes. My "delusion". :D **The Psychiatry. But the light usable and well misused form.** This form don't need a true knowledge more, only i.e. vindictiveness or simply greediness... With cookbook, provocations, mobbing, flooding - and producucing many true mental illness people at the end. Or? As in the Middle Ages the Inquisition acted, acting this similar nowadays... But for every purpose for everyday use. Or?

- **A truth. It is (of course) the only truth.** Our law needs it. Our laws speaking about an absolute truth. But I think, every truth are subjective. Think an a fox and a rabbit. We should use the truth of our natural living environment, not forget it, that it exists natural living environment without humans, but humans can't exists without natural living environment. Mindest we have some germ in our bowel...

**What can we do?**

I think, we should use **money, but well backed with valuables.** Later we can use clear barter. We have a well IT envirnment to implement a such system already. I do experiments with such systems at this time as full time job, as No-Business of course. **We shouldn't trust a religion in a government.** The **freedom in religion** should be given of everybody. The **freedom for thinking, speaking** should be given also. We should change our laws. **Our laws should use the truth of our natural living environment.** We, humans, are also in it! It is our whole living REALITY, our truth GOD.
